

# INFLUENZA

## What Do You Know?

DO YOU FEEL YOU KNOW ENOUGH TO MAKE THE RIGHT DECISION FOR YOU AND YOUR FAMILY?

Through the help of the media, the CDC, the pharmaceutical industry and health officials consistently tout one of the biggest lies in medicine:

**Every year we have 36,000 or more Americans die from the flu.**

**But where and how do they get this number?**

“The number of reported deaths [due to complications of the influenza virus] is based on a mathematical model and **not actual swabbing of the nasal cavity.**”

-CDC spokesman Curtis Allen quoted by WorldNetDaily.com in a web publication of an *Insight* magazine article for January 2004.

This vaccine has already been documented to be a failure for both adults and children in the medical journals and in media articles.

Remember Chiron's (British vaccine manufacturer) contamination crisis that supposedly cut the vaccine supply for America last year? How many people actually died from the flu because of the shortage? **NONE!** And in a typical year, total deaths associated with complications of influenza in the USA are only about 1250, not 36,000.

\*The consent form you sign prevents you from holding the physician or manufacturer liable should you suffer any serious adverse reactions.

### Some Ingredients

- Formaldehyde
- Mercury
- Aluminum hydroxide
- Residual components of chicken embryo

### Adverse Reactions

- Gillian Barre
- Respiratory Complications
- Cardiac Complications
- Death
